

Dr. Jiunn-shyong (Rolly) Luo is a principal engineer in the Department of Corrosion Prevention Research at the Material and Chemical Research Lab, Industrial Technology Research Institute (ITRI), Taiwan, where he has been working since 1998.

He obtained his M.S. and Ph.D. degrees from Florida Atlantic University, USA, in 1987 and 1991, respectively, majoring in cathodic protection of marine materials at the Department of Ocean Engineering. Presently, his research and projects focus on cathodic protection, stray current corrosion, atmospheric corrosion, marine corrosion, rebar corrosion, and microbiologically influenced corrosion

Dr. Rolly is an AMPP (The Association for Materials Protection and Performance, USA) certified Corrosion specialist, Cathodic protection specialist, and senior certified coating inspector. He also serves as a CP1, CP2, and CP3 instructor at AMPP. Currently, he is a Chapter Delegate officer of AMPP Taipei Chapter.
